PROFESSIONAL SUMMARY

Java Full Stack Developer (fresher) and Computer Science Engineering graduate (B.Tech, completed July 2026, 7.5+ CGPA) currently pursuing Full Stack Java training at Naresh IT, with a Web Development internship at TechnoHacks EduTech. Skilled in Core Java, JDBC, Servlets, JSP, JSTL, Collections Framework, Spring Core, Spring JDBC, Hibernate (basics), Oracle SQL, HTML, CSS, and Bootstrap, with a strong understanding of CRUD operations and MVC architecture flow. Built multiple database-driven and full-stack web applications, and won 3rd prize in a coding competition (Sep 2026). Seeking an entry-level Java Developer or SQL Developer role to contribute to backend and database-driven development.

TECHNICAL SKILLS

- **Programming & Database:** Java, SQL (Oracle SQL)
- **Java Technologies:** JDBC, Servlets, JSP, JSTL, Collections Framework
- **Frameworks:** Spring Core, Spring JDBC, Spring Boot, Hibernate Mapping
- **Concepts:** CRUD Operations, MVC Architecture Flow, OOP
- **Web Technologies:** HTML5, CSS3, Bootstrap
- **Tools & IDEs:** Eclipse IDE, Git, GitHub, JUnit, Antigravity, GitHub Copilot

INTERNSHIP & TRAINING

Full Stack Java Development Training — *Naresh IT (Ongoing)*

- Currently undergoing hands-on training in Core Java, Collections Framework, JDBC, Servlets, JSP, JSTL, Spring Core, Spring JDBC, Hibernate (basics), Oracle SQL, HTML, CSS, and Bootstrap.
- Applying MVC architecture and CRUD operations to build database-driven web applications.

Web Development Intern — *TechnoHacks EduTech*

- Completed a Web Development internship building responsive front-end web pages using HTML, CSS, and Bootstrap.

EDUCATION

B.Tech — Computer Science Engineering

Dr. Babasaheb Ambedkar Technological University, Raigad | Completed: July 2026 | CGPA: 7.5+

PROJECTS

1. Online Product Management System — *Java, Servlets, JDBC, JSP*

- Built a product management web application implementing complete CRUD operations with Servlets, JSP, and JDBC connected to a relational database.
- Demonstrates the end-to-end request workflow: JSP view → Servlet controller → JDBC data layer → database, and back to the view.
- GitHub: github.com/ganuborade/Online-Product-Managment-System

2. AI Smart Civic Complaint Management System — *Java, JDBC, JSP, JSTL, Servlets*

- Developed a web-based system for citizens to register civic complaints and for authorities to track and manage them, using the MVC approach with Servlets, JSP, JSTL, and JDBC.
- **Achievement:** Won 3rd Prize in a coding competition (25 Sep 2026) for this project.
- GitHub: github.com/ganuborade/AI-SMART-CIVIC-COMPLAINT-MANAGMENT-SYSTEM

3. My Village Web Project — *HTML, CSS, JavaScript*

- Developed a web-based village information portal with a responsive, mobile-friendly user interface.
- Live project: ganuborade.github.io/my-village-portal

4. Temple Portal — Full Stack Project — *Full-Stack Web Development*

- Developed a full-stack temple portal web application presenting temple information and devotee-related details through a responsive, easy-to-use interface.
- Live project: math-portal-9zgx.onrender.com

5. Face Recognition Attendance System (AI) — *Python, OpenCV, SQL, HTML/CSS/JavaScript*

- Developed an AI-powered attendance system using OpenCV and Python for real-time face recognition, storing attendance records in an SQL database.
- Built a responsive web interface (HTML, CSS, JavaScript) for registration, attendance monitoring, and report generation.
- Live project: autoattend-face-recognition.onrender.com *(Full-stack AI project — created using AI)*
